

## REQUIREMENTS FOR SAMPLE COLLECTION BACILOSCOPY

### REQUIREMENTS:

1. Identification document.
2. Insurance card.
3. Medical order with information about the test to be performed.
4. Authorization from the insurance company.

### ON TEST DAY

1. Preferably collect the sample in the morning (on an empty stomach) to avoid contamination with food traces.
2. Before collecting the sample wash your mouth with water several times, do not use mouthwashes
3. Breathe, cough deep and hard to tear the throat content.
4. Place the contents in the vessel supplied by the clinical laboratory. Ensure the sample not only contains saliva, a good sample contains much phlegm and little saliva. The vessel should be opened only at the time of the collection.
5. Cover the bottle well and mark it with the full name.
6. Deliver the sample to the laboratory within two hours (after collection). If you can't meet this time, refrigerate the sample, but do not to exceed 24 hours.

### AFTERCARE

Not required.
